Image Mixer – Install (windows only)

- **Download Code::Blocks <u>+ MinGW</u>**: this is the link (click here)
- **Install Code::Blocks** , just follows the guided installer. Use standard settings.
- **Download Image Mixer**: this is the link (click here)
- **Unpack Image Mixer** in the desired folder (be sure that you use a easy to find and to remember folder, for example "documents"): you don't need to install it, there are no hidden files etc... when you are bored of it you can just delete the whole folder without more problems.

Didn't have WinRar or WinZip? Get 7-Zip it's free, reliable and small. (click here)

Now you are done.. :)

- Now that you have Code::Blocks installed, you can <u>double click</u> the <u>project file</u> to open Image Mixer. Have fun!
